STAT

SUBJECT:

AFS/OIT Interface Control Document

1. Per our phone conversations, I am forwarding a copy of the Automated FBIS System (AFS)/OIT (SNADS) Interface Control Document (ICD).

2. Due to the uncertainty, past and present, in developing the AFS/OIT interface, FBIS has suspended all contractor work on the interface until the ICD is OIT approved and under OIT configuration control. It is critical that we resume work soon if the interface is to be operational in the near future.

3. In a 9 February meeting between DD/OIT and C/ESG/FBIS, it was agreed:

a. That the ICD will be completed and put under control in the near future; and

b. That the actual interface to SAFE would proceed through testing (operational capability would be suspended until SAFE Delivery 3 has been accomplished).

Office contacts designated at that meeting are:

4. I would appreciate any insight you could share on the time estimated for approval of the ICD document. If you require any additional information, please contact me at
